

PUPPET ARM PATTERN

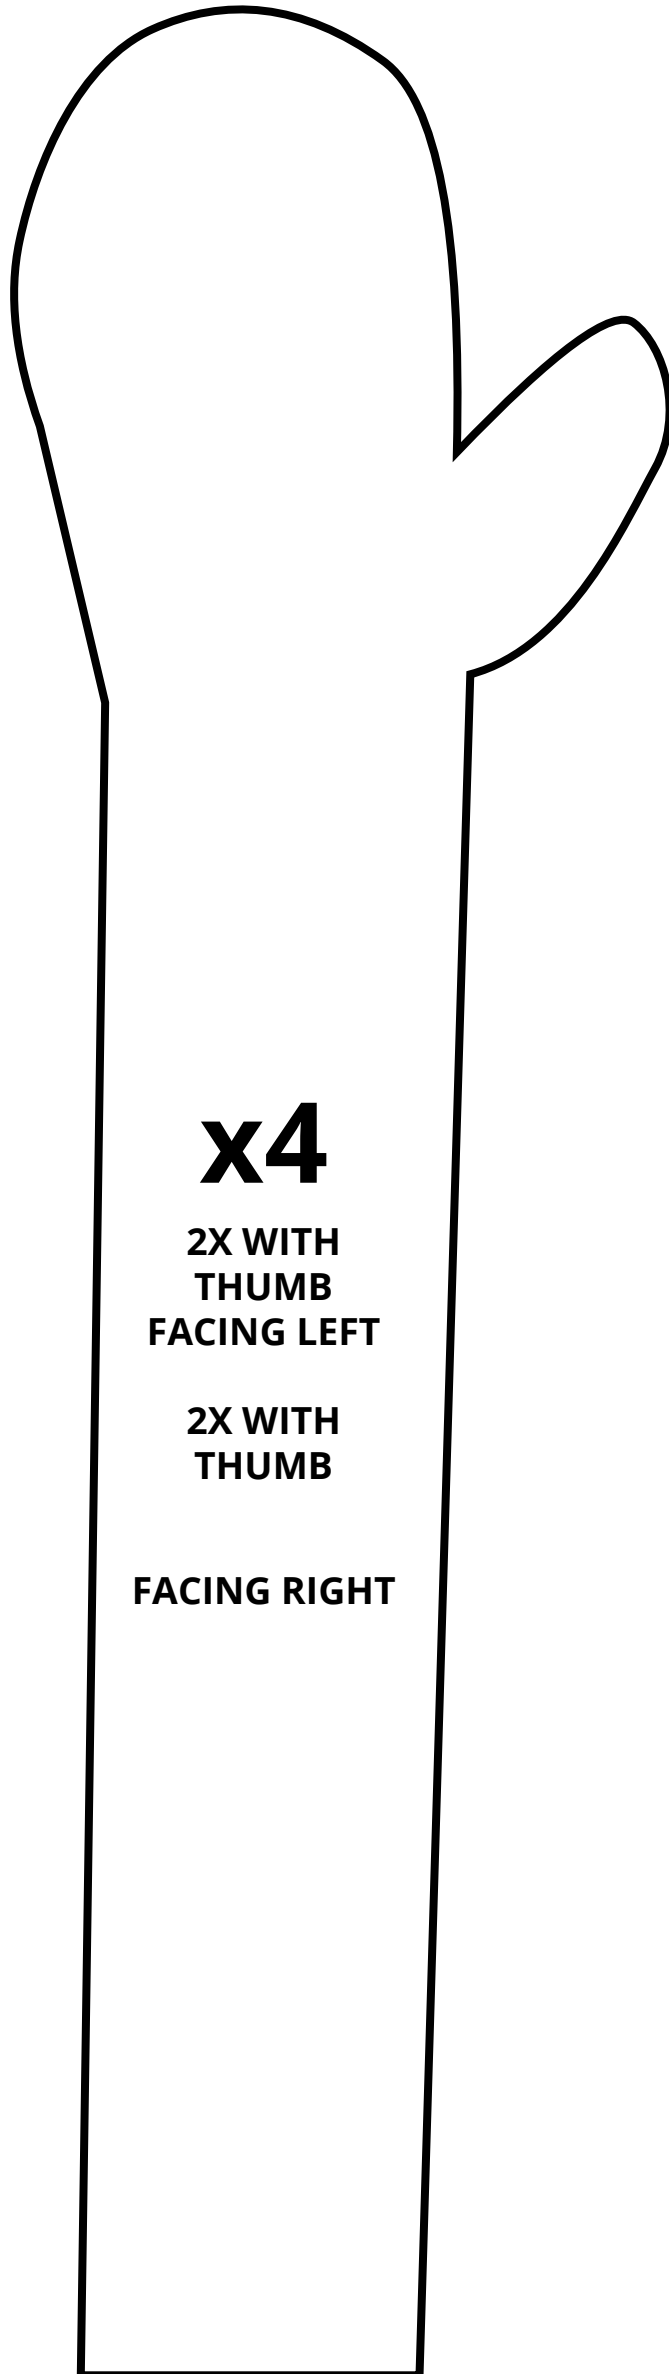

DIRECTIONS

9. Cut out the pattern and trace it two times on the back of your fleece, then flip it and trace it two more times.

10. Cut out the fabric then sew the pieces together so that you have a right arm and a left arm. Make sure you sew them together with the fleece on the inside and the backing on the outside, then turn them inside-out so that the fleece is facing out.

11. Sew them to the body of your puppet. A good guideline for attaching them to the body is to use the seam line created on the body when you sewed the two body pieces together. Make sure the thumbs are facing upwards when attaching to body.

12. Go on to the pattern page marked "PUPPET MOUTH PATTERN."
